PROFESSIONAL SUMMARY

Full Stack Developer with 2 years of hands on experience building scalable web and mobile applications using the MERN stack, Next.js, and React Native. Specialized in automating business workflows and integrating AI driven features to enhance operational efficiency. Proficient in developing secure, user centric solutions with Groq and Gemini integration, focusing on high impact software delivery

PROFESSIONAL EXPERIENCE

Full Stack Developer | Internship | Saylani Mass IT Training (SMIT) | June 2026 – Present

- ByteChat: A full-stack B2B AI SaaS platform built with Next.js, Node.js, Express, and MongoDB that integrates the Groq AI API to let businesses configure and deploy custom chatbots with real-time session tracking and markdown rendering.
- Focused on technical optimization, clean database architecture, and production readiness to align applications with enterprise hiring standards.

Jr. Full Stack Developer | Full time | TaxFilerz & Co. | Dec 2025 – June 2026 | 6 Months

- Designed and deployed custom lead generation funnels using Next.js and Express to streamline client inquiries and improve response tracking.
 - Developed a property management mobile application with React Native (Expo) to provide a seamless browsing experience for users across multiple device types.
 - Optimized the "Brand Socia" agency website using React and Tailwind CSS, successfully improving the overall page load performance for a smoother user experience.
-

KEY PROJECTS

AGAZ - Real Estate App

Tech Stack: React Native (Expo), Express.js, MongoDB, Firebase

- Built a dedicated mobile platform to help users browse and search for properties with custom filters.
- Integrated Google authentication and a secure backend system to allow users to manage their profiles and property preferences easily.

ByteTech CRM Portal

Tech Stack: React.js, Tailwind CSS, Express.js, MongoDB, JWT

- Built a lead management system where users can create, update, and manage their own sales leads.
- Implemented role based access control to allow admins to track individual employee activity, manage all leads, and oversee overall platform performance.

ByteChat - AI Chatbot Builder

Tech Stack: Next.js, Tailwind CSS, Framer Motion, Express, Groq AI API, MongoDB

- Developed a SaaS platform that allows business owners to create custom AI chatbots by providing simple business details and generating professional system prompts automatically.
 - Implemented a slug based access system for each chatbot, enabling easy integration on social media or websites while storing all user conversations securely in the backend.
-

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, React Native (Expo CLI), Tailwind CSS, SCSS, Redux Toolkit.

Backend & Database: Node.js, Express.js, RESTful API's, MongoDB, Redis, JWT, Hashing, Cookies Handling, Rate Limiting.

Tools & Cloud Services: Git/GitHub, Postman, Vercel, MongoDB Compass, Cloudinary, AI Integration (Groq & Gemini), Grafana K6.

EDUCATION & CERTIFICATIONS

Intermediate - City Collage (Ongoing)

Web & App Development Certification, Saylani Mass IT Training (SMIT) • Hackathon Participation Certificate, Saylani Mass IT Training
