Full Stack Developer (MERN & AI Integration)

PROFESSIONAL SUMMARY

I am a full-stack developer specializing in the MERN stack and Next.js. Currently working professionally, I build scalable web apps with AI integration using Gemini and Groq. I write clean code, develop REST APIs, handle advanced security, and deploy applications. I focus on creating fast, user-friendly solutions that grow with users while staying updated with modern web technologies and industry standards.

PROJECTS

• Personal Portfolio Website

Built a responsive portfolio using React.Js to showcase skills, projects, and contact details.

Optimized for mobile and desktop; designed custom layout to reflect personal branding and highlight MERN stack capabilities.

AI Medical Assistant – Healthcare Analysis Web App (HealthMate)

Developed a full-stack AI-powered medical web application for analyzing health reports. Built with React.js, Node.js, MongoDB, and Express.js. Includes secure authentication, report upload, and AI-based image and text analysis. Focused on clean UI/UX and smooth performance across devices. [Link](#)

BrandSocia

Contributed to the development of BrandSocia's production website by building responsive UI sections, integrating assets, and collaborating with designers and team members to deliver a professional service-based web platform.

Real State Application (AGAZ)

Designed a full-featured real estate platform where users can browse and list properties. Buyers can find homes, while sellers and agents manage listings. Includes view-tracking system, role-based dashboards, and property management. Users can track views, update listings, and save properties. All functionality is protected through secure JWT authentication.

High-Converting Sales Funnel

Built a responsive high-converting sales funnel using Next.js, Node.js, and Tailwind CSS. Focused on lead generation, optimized checkout flows, conversion tracking, and responsive layout for all screen sizes. [Link](#)
